

Help map all of Earth's history in one place.

MapStory is an open atlas that anyone can edit to organize humanity's shared knowledge about how the world evolves geographically over time.

Collect Open Data

Join universities, governments, and community organizations to import StoryLayers—openly licensed spatial and temporal data—and make them available for use.

Tell & Share Stories

Add text, images, and videos to tell stories about geographic change on Earth. Then share your MapStories with the world.

Community Review

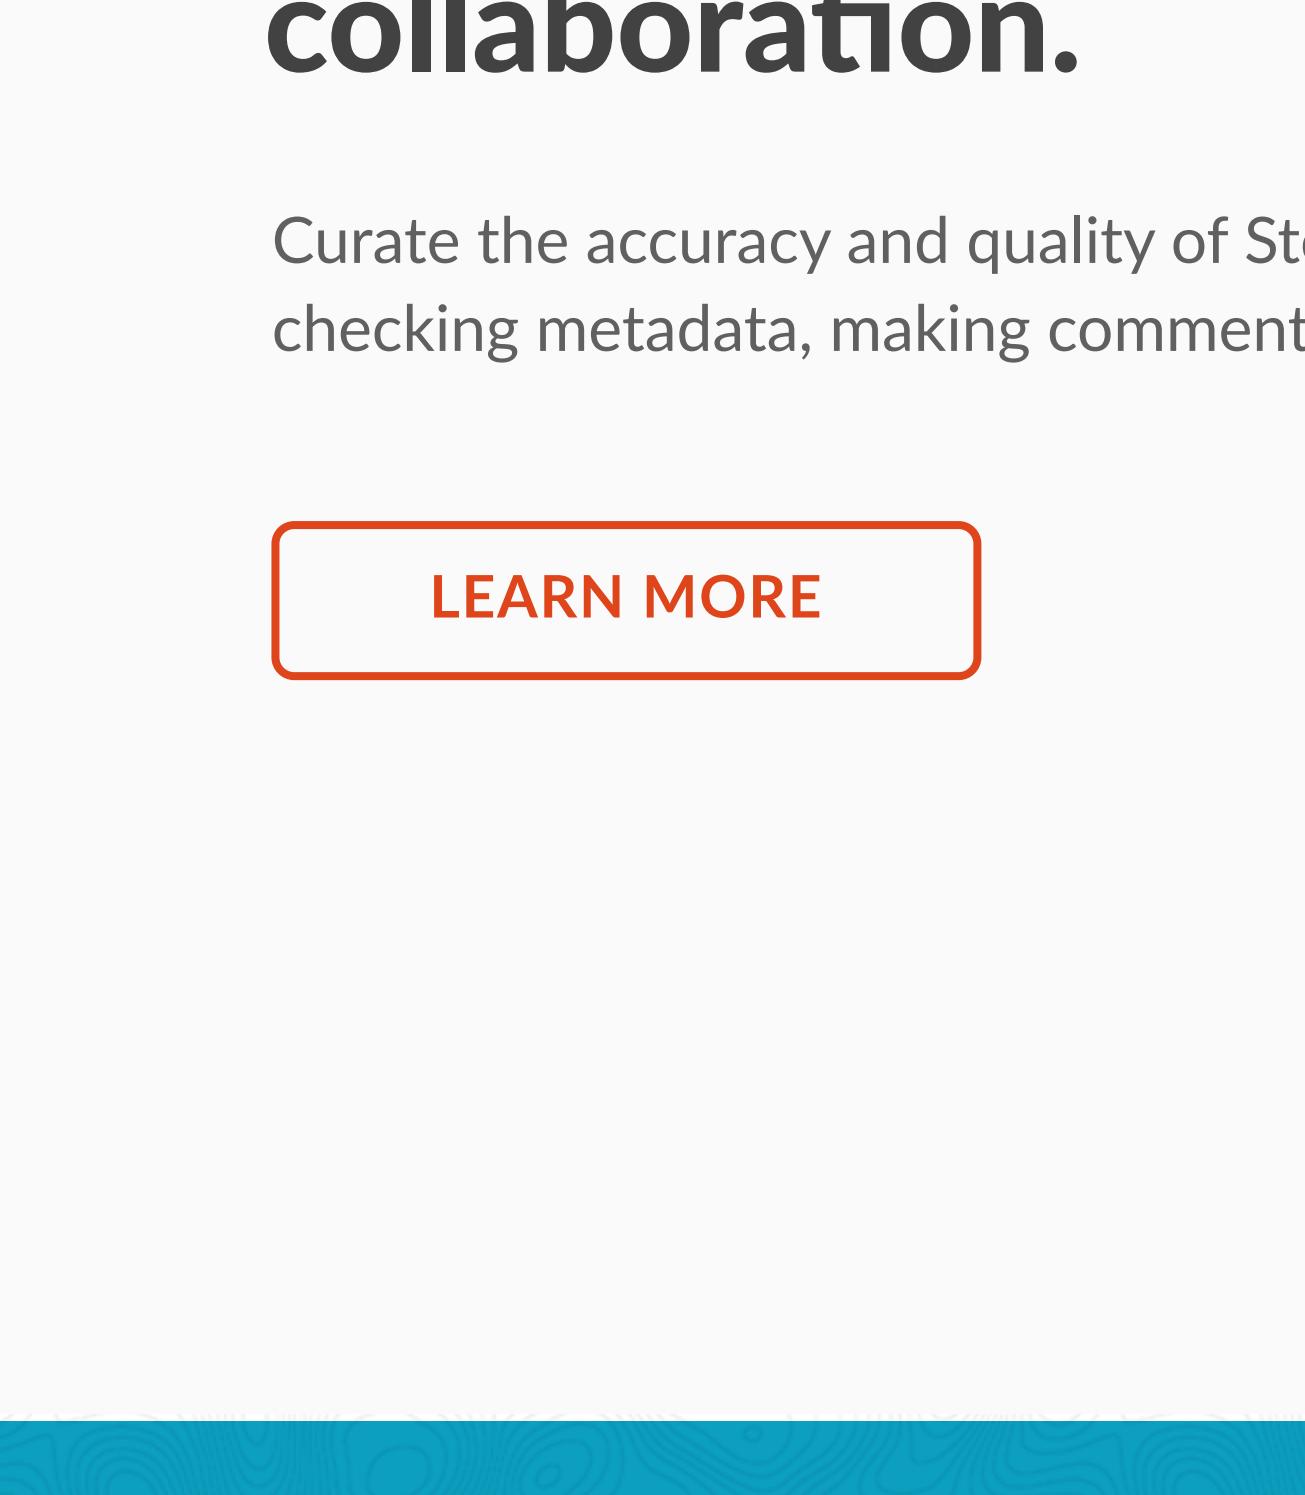

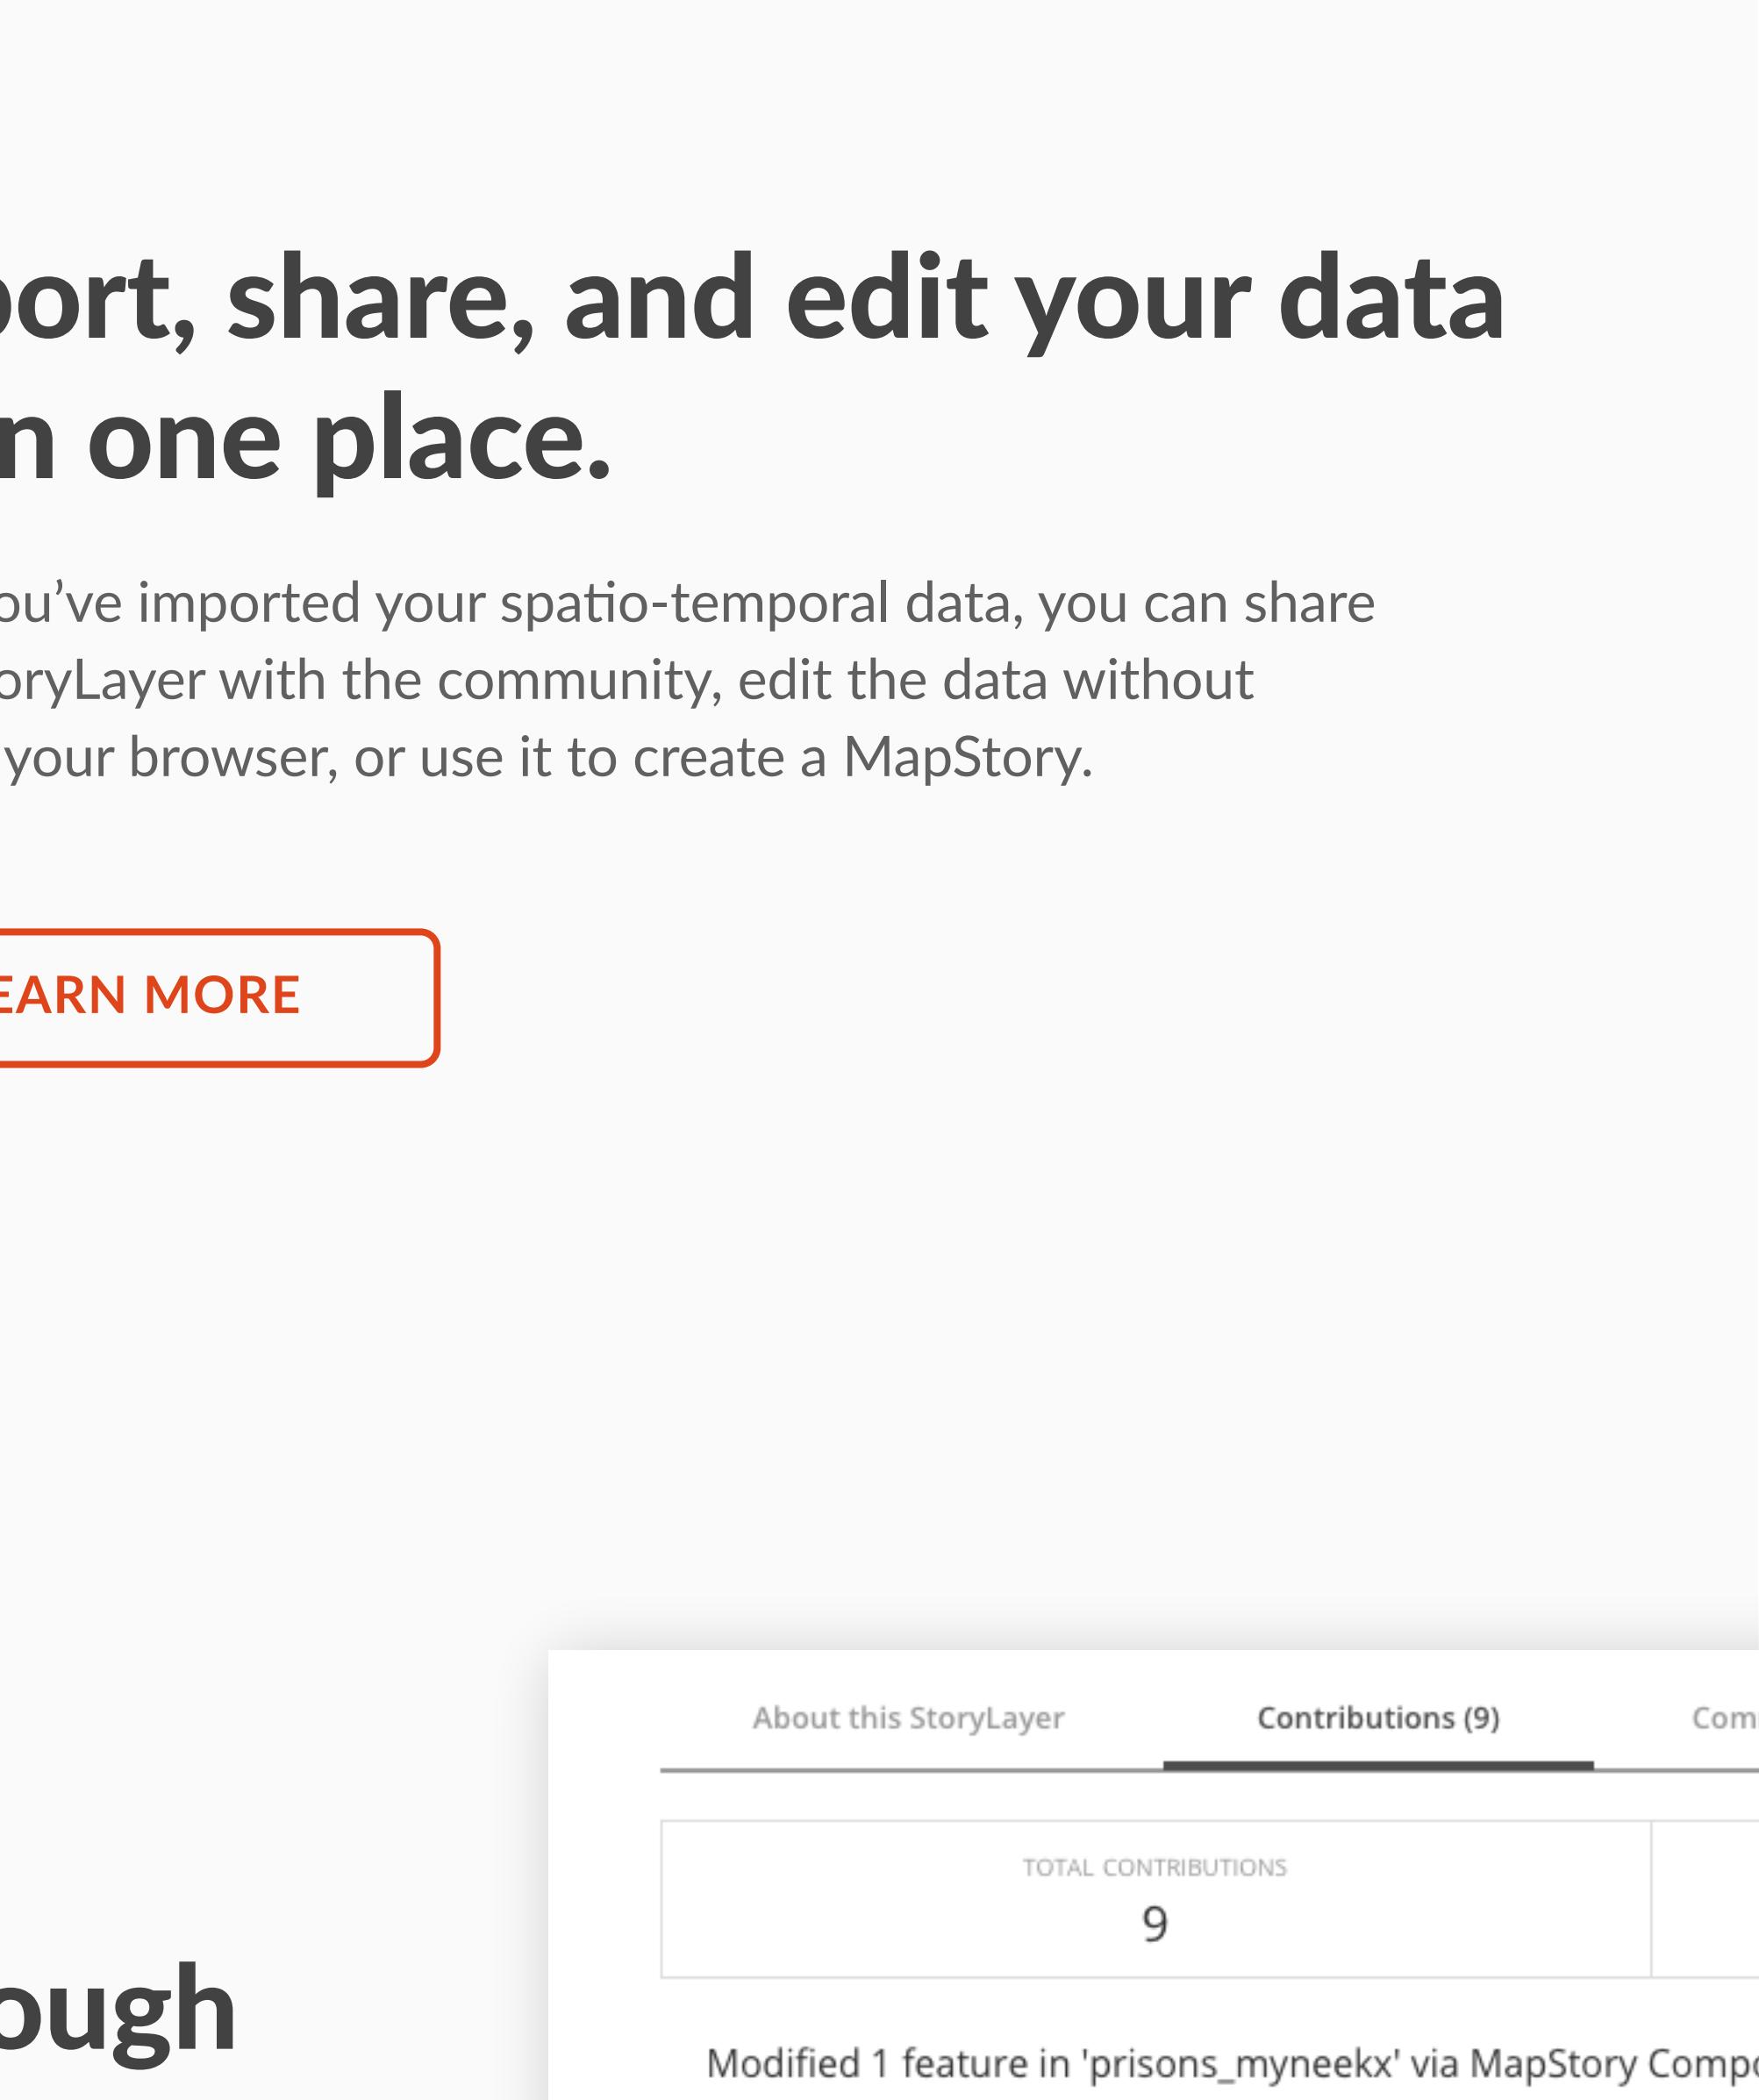

Keep MapStory.org as complete and accurate as possible by editing and reviewing others' StoryLayers and MapStories.

[SIGN UP](#)

Bring your story to life.

With MapStories, you can show change over time to paint a richer picture of historical change.

Add narrative elements like images, text, or video to enrich your audience's understanding of changes or events. No coding required.

[LEARN MORE](#)

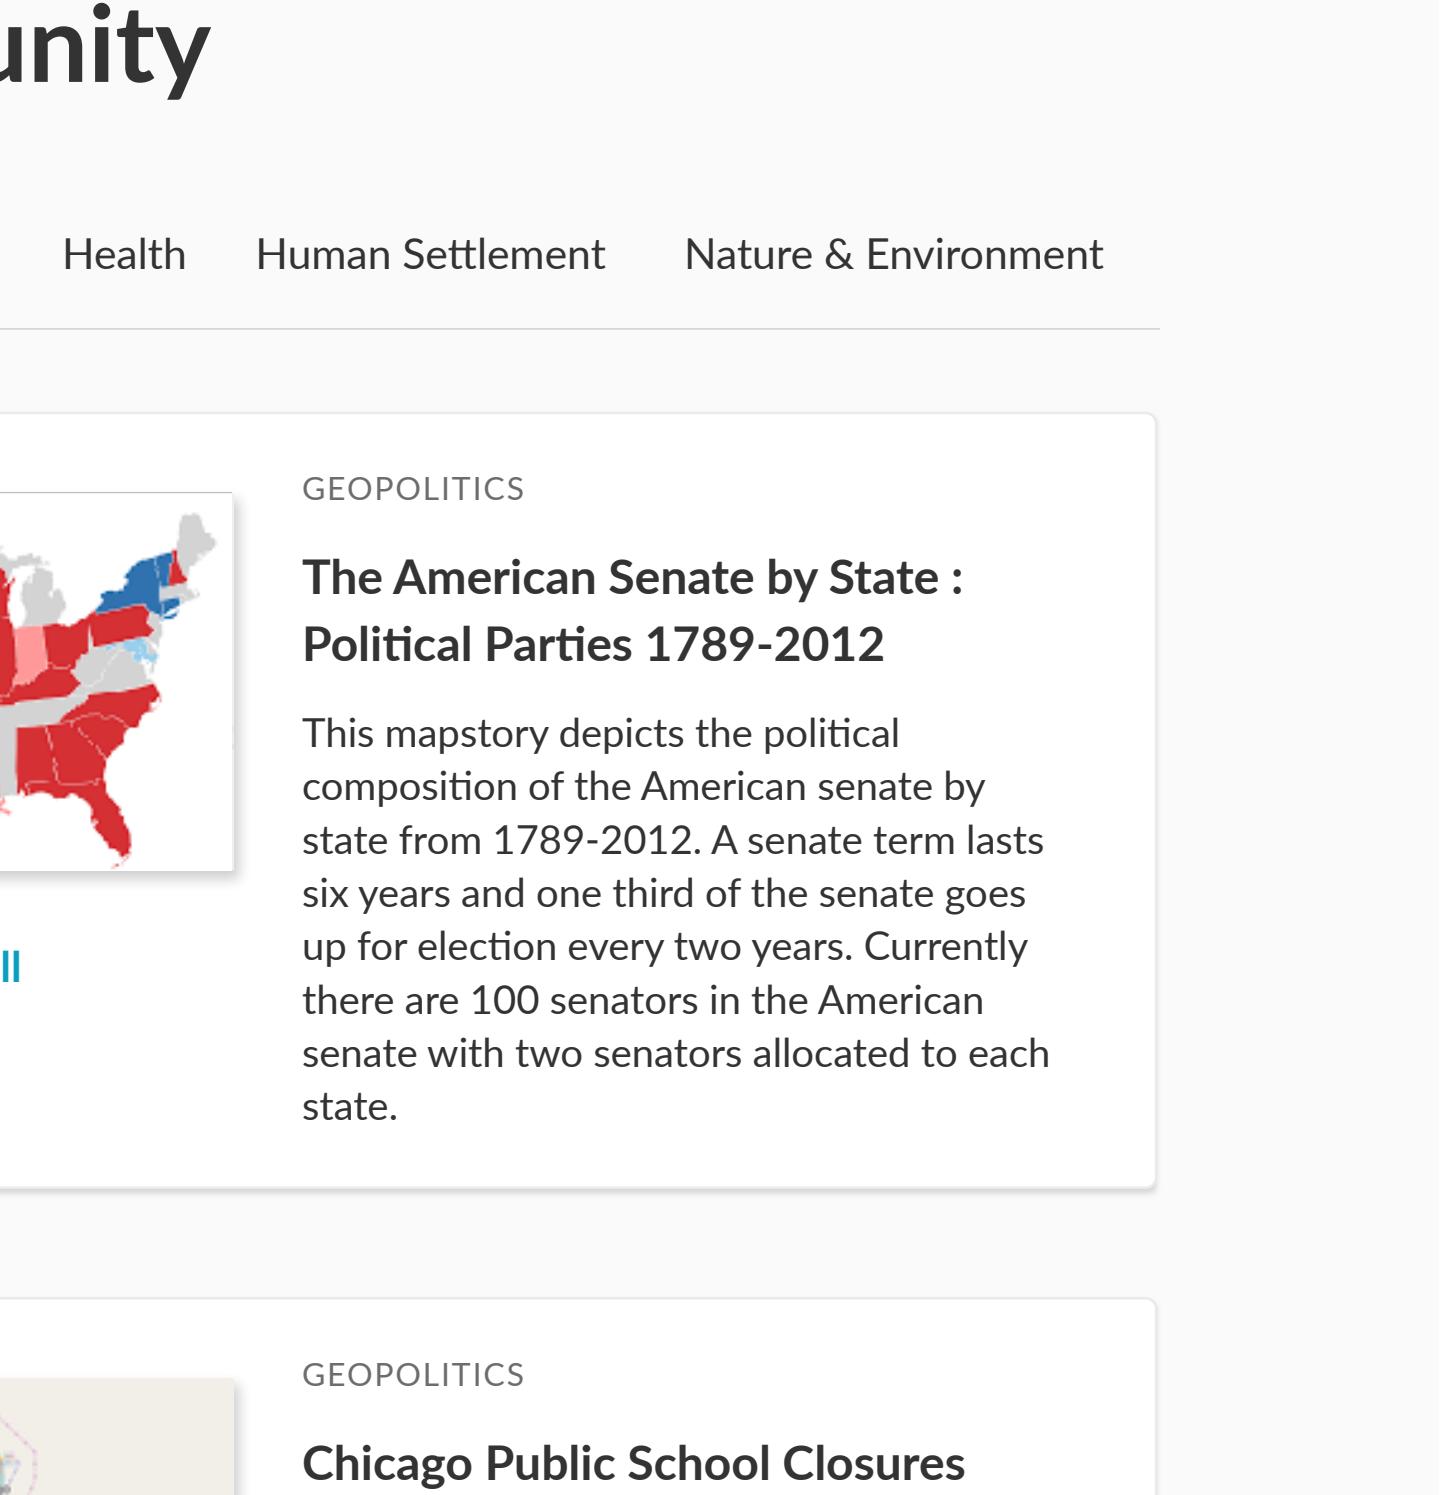

Import, share, and edit your data all in one place.

Once you've imported your spatio-temporal data, you can share your StoryLayer with the community, edit the data without leaving your browser, or use it to create a MapStory.

[LEARN MORE](#)

Improve data accuracy through collaboration.

Curate the accuracy and quality of StoryLayers by adding ratings, checking metadata, making comments and committing version edits.

CRISIS
Village Destruction in the Darfur Region
The "Darfur Damaged and Destroyed Villages" dataset describes the condition of villages in the Darfur region of Sudan that the U.S. Government has confirmed as either "damaged" or "destroyed" between the time period February 2003 to December 2010. Additionally, villages that are confirmed to have "No Damage" are...
