How It Works

Upload datasets as StoryLayers or, if you

don't have data to upload, generate new StoryLayers from scratch.

Edit StoryLayers shared by the community to

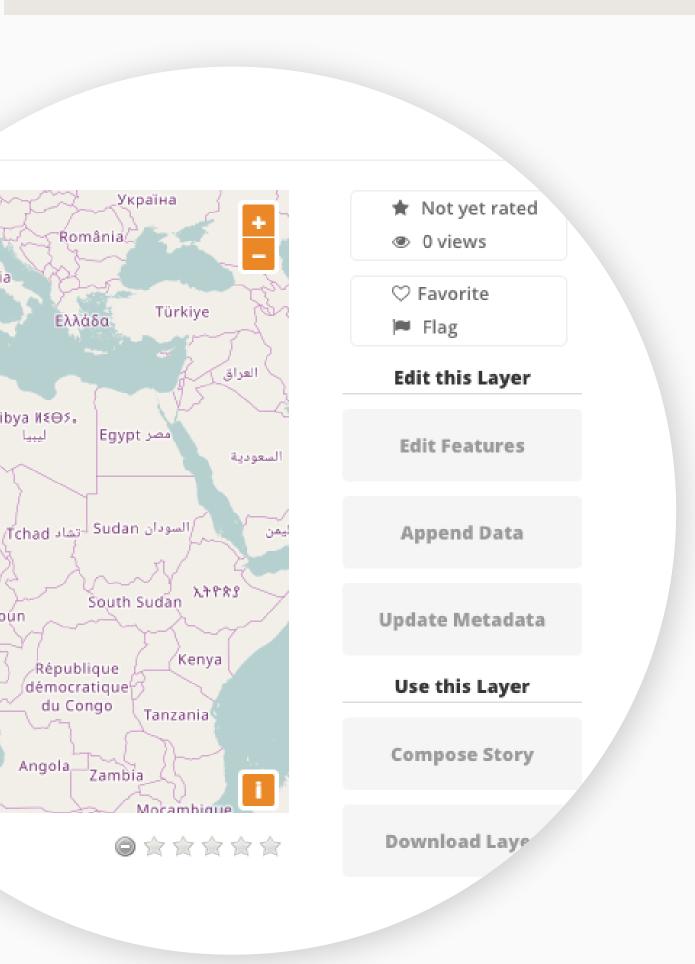

make them as complete and accurate as possible.

Compose MapStories by combining

StoryLayers with text, images and video and then share them with a global audience.

SIGN UP

Contribute to the global data commons Put your data in a place where it can live accessible to all, in

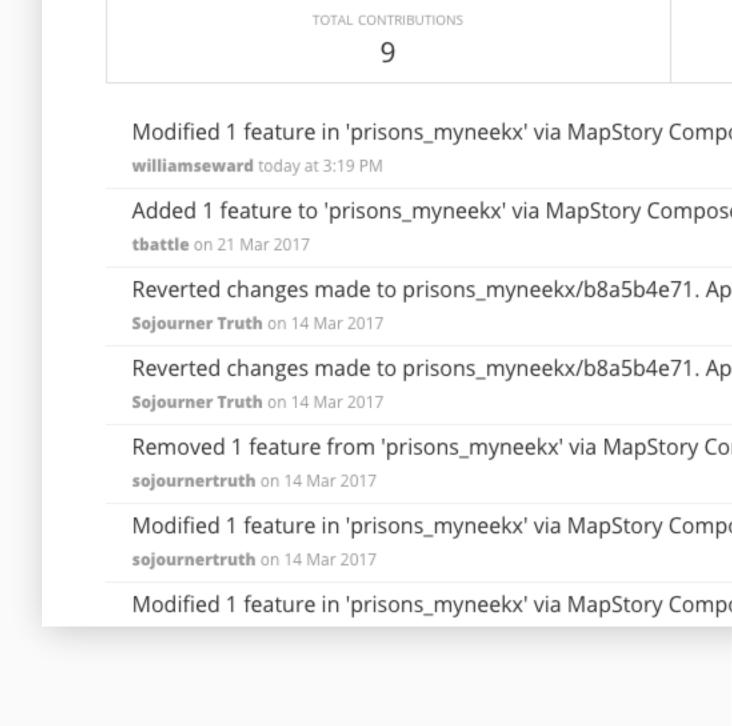

perpetuity, without being subject to commercial influence.

LEARN MORE

through edits Curate the accuracy and quality of StoryLayers by adding ratings, checking metadata, making comments and committing version edits.

Share your expertise
